

Bruce J. Kelman, Ph.D., DABT, ATS, ERT

Principal Toxicologist and President

Redmond, WA

☎ 425.556.5555

✉ bkelman@veritox.com

Bruce J. Kelman, Ph.D., has held positions as Principal Toxicologist and President of Veritox[®], Inc. since 1998. He has more than 40 years of experience in toxicology and has served as a consultant and expert in investigations across North America, South Korea, and the United Kingdom. Dr. Kelman has evaluated numerous claims of personal injury and health impacts from many chemicals and drugs, and has presented a variety of health risk concepts to policy makers, government regulators, citizen groups, and individuals.

Dr. Kelman is certified in toxicology by the American Board of Toxicology and the Academy of Toxicological Sciences, and is admitted as a European Registered Toxicologist in both the United Kingdom and EUROTOX registries. Dr. Kelman holds a Ph.D. from the University of Illinois (1975) and has been certified in toxicology by the American Board of Toxicology since 1980. His research has focused on components of health risk models including mechanistic studies aimed at quantifying exposure of critical organ systems, and includes more than 100 scientific publications. Dr. Kelman has experience with both chemical and physical agents (including asbestos, pesticides, solvents, vapors, metals, microbial agents, and electric and magnetic fields), exposure scenarios (including environmental, occupational, residential, and clinical), and routes of exposure (including inhalation, oral, and percutaneous). He has conducted health-effects evaluations of a variety of contaminated environmental sites and has experience with numerous air and water quality issues.

Dr. Kelman was elected to and served on the Board of Directors of the American Board of Toxicology from 2011 – 2015. He is a member of the Society of Toxicology, British Toxicology Society, American College of Occupational and Environmental Medicine, American College of Medical Toxicology, American College of Toxicology, American Society for Experimental Pharmacology and Therapeutics, Society for Experimental Biology and Medicine, and Teratology Society. He served as a member of the National Research Council/National Academy of Science Committee on Possible Effects of Electromagnetic Fields on Biologic Systems. Dr. Kelman has received best paper awards from the Society for Experimental Biology and Medicine, American Industrial Hygiene Association, and Society of Toxicology. Dr. Kelman was a co-author of the evidence-based position statement “Adverse Human Health Effects Associated with Molds in the Indoor Environment” issued by the American College of Occupational and Environmental Medicine from 2002 until 2015.
