Karin Hayman is a Geologist at Veritox®, Inc. She has a Master of Science degree in Geophysics from the School of Oceanography at Oregon State University and a Bachelor of Arts degree in Geology from the University of California at Santa Barbara. She is a Registered Geologist (RG) in Washington and Oregon, and an active member of the Geological Society of America, the Northwest Geological Society, and the Association for Women Geoscientists.

Ms. Hayman has more than twenty years of professional experience in the geosciences, including the fields of environmental consulting; oil and gas exploration; hydrogeology; mineralogy; and structural geology. She has conducted extensive field work all around the contiguous United States and Alaska. Her experience also includes ten years in the software industry, with a focus on the development, quality assurance, and technical support of mapping, modeling, and data processing software for geoscientists.

Karin's expertise at Veritox®, Inc. includes:

- Asbestos
- Zeolites (e.g. erionite), and other fibrous minerals
- Talc
- Research into and incorporation of location-specific geology and mineralogy data in exposure assessments
- Interpretation of geologic maps and studies to characterize potential historical exposures of individuals across a wide variety of geographic locations and geologic settings
